

Globus Medical to Participate in Orthopedic Trauma Association Annual Meeting

October 18, 2024

AUDUBON, Pa., Oct. 18, 2024 (GLOBE NEWSWIRE) -- Globus Medical, Inc. (NYSE: GMED), a leading musculoskeletal solutions company, is participating in the 40th Annual Meeting of the Orthopedic Trauma Association (OTA) in Montréal, Canada, October 23—26.

Join Globus at booth #361 during OTA for product demonstrations of the PRECICE™ technologies and our full orthopedic trauma product portfolio. Special highlights include our most recent additions to the portfolio including TENSOR™ Suture Button, ANTHEM™ II Distal Radius Volar Plates, AUTOBAHN™ Trochanteric Nail PRO Instruments, and CAPTIVATE™ SOLA Headless Screws.

Globus Medical will also showcase the most recent addition to the PRECICE™ Platform – the PRECICE™ Ankle Salvage System, the only nail on the market that is designed to compress the tibia-talar-calcaneus (TTC) joint intraoperatively and postoperatively, while also giving an option to lengthen the limb post-fusion.

"We are excited to offer our customers technology that is designed to make surgery easier for surgeons and provide better care for patients," commented John Mulcahy, president of Orthopedics and chief commercial officer at Globus Medical. "For example, the PRECICE™ Nailing System and the ANTHEM™ Plating System can provide unique solutions to our trauma surgeons for large traumatic bone defects via the Plate Assisted Bone Segment Transport technique."

Globus welcomes OTA attendees to join our workshop where an esteemed faculty will present all-internal limb reconstruction options for complex cases.

Thursday, October 24, 2024: 12:00 – 1:00pm

Internal Limb Reconstruction for Extremely Challenging Cases

- Moderator: Stephen Quinnan, MD – Paley Orthopedic & Spine Institute, West Palm Beach, FL
- Geoffrey Marecek, MD – Cedars-Sinai Medical Center, Los Angeles, CA
- Paul Matuszewski, MD – University of Kentucky Hospital, Lexington, KY
- John Scolaro, MD – University of California Irvine, Orange, CA

This will be the second year Globus Medical is presenting PRECICE™ as part of the broader orthopedic trauma portfolio. With many clinical studies, the all-internal limb lengthening technology continues to help revolutionize limb reconstruction in the trauma market. The PRECICE™ Intramedullary Limb Lengthening System is FDA cleared for limb lengthening, open and closed fracture fixation, pseudarthrosis, malunions, nonunions, or bone transport of long bones in patients aged 18 years and older and indicated for limb lengthening of the femur and tibia in pediatric patients (greater than 12 years old). This system, along with ANTHEM™ Plating systems, can provide solution for bone transport in long bones.
