Section 1 - Conflict Mineral Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”) defines “Conflict Minerals” as columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives tantalum, tin and tungsten. In 2015, Globus Medical sold certain medical devices that contained Conflict Minerals. In accordance with the rules promulgated pursuant to the Dodd-Frank Act, we conducted a reasonable country of origin inquiry with respect to those Conflict Minerals that were contained in the medical devices that we sold in 2015 and were not outside of the supply chain prior to January 31, 2013. A majority of those medical devices were manufactured for us by third party suppliers. During 2015, we also manufactured a significant portion of our implant products at our facility in Eagleville, Pennsylvania. As part of our inquiry, we asked all third party suppliers of our medical devices containing Conflict Minerals to identify the source of those Conflict Minerals. We also performed the same inquiry of our raw materials vendors for our in-house manufactured products containing Conflict Minerals. This information included the name of the smelter that processed the Conflict Minerals that were not outside of the supply chain prior to January 31, 2013. Our inquiries noted that each of these smelters is on the Conflict Free Smelter List maintained by EEIC - GeSI.

Conclusion

Based on our reasonable country of origin inquiry, we have no reason to believe that any Conflict Minerals contained in medical devices manufactured for us in 2015 originated in the Democratic Republic of the Congo or an adjoining country.
